To,

Hiring Manager

Capgemini

Subject: Application for SDET / Automation Test Engineer

Dear Hiring Manager,

I am writing to express my interest in the Software Development Engineer in Test (SDET) / Automation Test Engineer position at Capgemini. With over 8 years of experience in Manual and Automation Testing, I have developed strong expertise in designing robust automation frameworks, improving testing efficiency, and ensuring high-quality software delivery.

Currently, I am working as an SDET at Cirtru Classified Pvt Ltd, where I implemented a Selenium-Java TestNG/Maven automation framework from scratch, reducing testing time by 40% and increasing overall test coverage by 25%. I am actively involved in automation scripting, framework development, code reviews, and CI/CD integration using Jenkins.

Previously, at PlanIT Testing India Pvt Ltd, I contributed to improving quality control processes, automated deployments using Jenkins, and handled API, load, and performance testing for enterprise applications. My technical skills include Selenium, Java, TestNG, Maven, API Automation, Mobile Automation (iOS/Android), CI/CD, Jenkins, JMeter, and Postman.

I am particularly drawn to Capgemini because of its global reputation for innovation, technology leadership, and commitment to delivering high-quality digital solutions. I am confident that my experience in automation, problem-solving, and agile collaboration would allow me to contribute effectively to your engineering and QA teams.

I would welcome the opportunity to discuss how my skills and experience align with Capgemini's requirements. Thank you for your time and consideration. I look forward to hearing from you.

Yours sincerely,

Amol Chandrakant Dabholkar
