PROFESSIONAL SUMMARY

Results-driven SDET with 8+ years of experience across web, desktop, API, and mobile (iOS/Android) testing. Specializes in building scalable automation frameworks from scratch using Selenium WebDriver, Java, TestNG, Maven, and REST Assured, integrated into CI/CD pipelines with Jenkins, Git, and Docker.

Built and maintained 400+ automated test cases and led QA teams of up to 8 engineers, delivering a 40% reduction in testing time and a 25% increase in coverage. Strong across functional, regression, integration, API, and performance testing, with a deep focus on code review, defect management, and STLC optimization in Agile/Scrum environments.

KEY ACHIEVEMENTS

- Reduced overall testing time by 40% and increased test coverage by 25% by building an automation framework from the ground up.
- Cut manual errors by 50% and improved deployment speed by 30% through Jenkins-driven CI/CD automation.
- Built and maintained 400+ automated test cases across web, API, and mobile platforms.
- Led and mentored QA teams of up to 8 engineers across enterprise and fintech projects.

TECHNICAL SKILLS

Languages & Automation: Java, Selenium WebDriver, TestNG, Maven, Appium, Page Object Model (POM), Data-Driven & Keyword-Driven Frameworks

API & Performance: REST API Automation, REST Assured, Postman, JMeter, Load & Performance Testing

Mobile Automation: iOS Automation (XCODE), Android Automation (Android Studio), Appium

CI/CD & DevOps: Jenkins, CI/CD Pipelines, Git, GitHub, Bitbucket, Docker, Google Cloud Platform (GCP), JAR Build & Execution

Test Management: Jira, TFS, Requirements Traceability Matrix, Test Case Design, Test Planning, Defect Tracking & Management

Testing Types: Functional, Regression, Integration, System, Smoke, Sanity, Black-Box, Exploratory, UI, API, Security Testing

Methodologies: Agile / Scrum, STLC, SDLC, Continuous Integration & Continuous Delivery

Security: OWASP Security Testing

PROFESSIONAL EXPERIENCE

Software Development Engineer in Test (SDET)

Jun 2024 – Present

Cirtru Classified Pvt Ltd

Mumbai, India

Cirtru — a trusted U.S. housing platform for renting houses and rooms safely and securely.

- Architected and built a scalable automation testing framework from scratch using Selenium WebDriver, TestNG, and Maven in Java with the Page Object Model design pattern, reducing testing time by 40% and increasing overall test coverage by 25%.
- Developed and maintained 400+ automated test cases covering critical platform workflows, achieving full automation coverage of core regression scenarios.
- Integrated REST Assured for API automation and configured the framework within CI/CD pipelines using Jenkins, Git, and Docker for continuous, repeatable test execution.
- Performed code reviews and provided sign-off for automation test cases, enforcing coding standards and maintaining long-term framework quality and maintainability.
- Partnered with developers and product owners in two-week Agile sprints to triage defects, prioritize automation coverage, and unblock release-blocking issues.

Test Engineer – Level 2
PlanIT Testing India Pvt Ltd

Feb 2021 – Jun 2024
Mumbai, India

Client: Kotak Securities Ltd | Project: Kotak Securities / DT Web & Desktop Application

- Led and mentored a QA team of 6–8 engineers, creating and executing complex JAR files through Jenkins automation that drove a 50% reduction in manual errors and a 30% increase in deployment speed.
- Owned API, load, and performance testing using JMeter and Postman, reporting quality metrics and project updates directly to senior management.
- Identified and designed end-to-end test cases, regression suites, and system test cases, ensuring comprehensive coverage across web and desktop trading applications.
- Drove continuous improvement initiatives within the quality control system, standardizing test processes and reporting across regression and system testing cycles.

Software Test Engineer
Pinnacle Technology Pvt Ltd

Jan 2020 – Feb 2021
Mumbai, India

Client: NSDL, Mumbai | Project: NJRS (National Judicial Reference System)

- Maintained 100% SLA adherence, proactively preventing SLA breaches across testing deliverables.
- Led test data identification and gathering, reducing testing timelines by 20%.
- Performed in-depth functional and exploratory testing of the Admin module and the entire application, including ongoing test case maintenance.
- Created a Requirements Traceability Matrix to ensure 100% test coverage and executed smoke and sanity testing.

Junior Software Tester
GCO Technology Pvt Ltd

Jan 2018 – Jan 2020
Mumbai, India

Projects: PM and Budget / Checkpoint App

- Created and executed functional and automation test cases using Selenium and TestNG.
- Performed API and mobile testing using Appium and Postman across hybrid applications.
- Conducted website, hybrid, security, and UI testing to validate quality across platforms.

EDUCATION

Master of Science in Information Technology (M.Sc. IT)
Guru Nanak Khalsa College (Autonomous), University of Mumbai

2022 – 2024
CGPA: 8.98

Bachelor of Science in Information Technology (B.Sc. IT)
Vidyalankar School of Information Technology, University of Mumbai

2013 – 2016
CGPA: 6.40

CERTIFICATIONS

- ISTQB Foundation Level Certified
- ACCELQ Certified Automation Engineer
- Tosca Automation Specialist Level 1 (AS1)
- OWASP Security Testing
- Software Testing Diploma
